

## The Rubric Cube

### Rubric Cube Veracity and/or Efficacy Summary

...after all, notion of U.S. division into two parallel Republican and Democrat nations seems visceral, hopeless regress

...jus' as New Americans sang dirge and left nanny-tyranny Europe only to see our cur blue Tory element emerge (now hegemony), so too could/would occur in a today-TexasRealRep-Republic but tomorrow-Texas-DealDem-pathetic

...so... wHAT... from 8 die high (Schaffner fall from or through downcaster guys?) must go evince and convince:

1-all happiness-loving 50% Reps of happiness-happiness of TEA H-A-T result

Hence All Terr summary:

-global one language speaking (Spanish or English?)

-full free movement of people

-expanded USA model

-New Citizens' Shareholder Dividend guaranteed income (which would also guarantee small efficient/sufficient government)

...only must insist TEA living half of 50% Reps be HAT activist (thoughts- words- action), they'd splay, round squares and pare-off win-over those SIMS voters who stand-around, an' win ground

2-zat passive half of misery-loving 50% Dems of happiness-miserableness (wut? ... if you love misery you're going to be miserable if you're happy) of HAT "insult"

...HAT sthenia simply being lief belief in actuality of words "schadenfreude" "sadism" "masochism" "bully" "incredulity" "jabberwocky" "enmity" "melancholy" "jealousy" "envy" "rapacity" "calumny" "putridity" "negativity," and thoughts tHAT half of us be hawkish happiness-loving Rep positives and zat half be mawkish misery-loving Dem negatives (an' small portion being seemingly subhuman shapeless-form mafia)

...thereby explaining to all us News here and thru universe the always misery-Old-goal  
sour-rot soporific non-logic of their lot's socialist-"progressive" thought/curse  
...providing TEA HAT logical and fun veracity and/or efficacy justification for our  
Schopfers' New-World-ought Old-World-naught move-tracing-sun remove-facing-fence  
psychological violence
